

WISH A DISH CLOUD BASED BILLING AND MANAGEMENT DASHBOARD

MULTIPLE BILLING MODES

We provide 3 types of billing modes for you to choose from and decide which one suits your restaurant's needs.

Table Mode | Menu Cards Mode | Manual Code

ADVANCED DATA ANALYTICS

Track your restaurant's performance by using our various data analytics parameters, which informs you regarding most ordered dishes, most profitable dish, sales trends, etc.

IVR SERVICES

Create a personal touch with your customers by using our IVR services which inform customers about everything that you want them to know about your restaurant.

HUMAN RESOURCE MANAGEMENT

Manage your restaurant's employees better by recording their attendance, leaves, salaries, etc.

CRM

Engage your customers by using our All-in-One CRM solution. Promote an event, organise marketing campaigns, offer discounts, reach out to customers through SMS, E-mail, notifications, etc, everything with just a few clicks.

SECURE

We understand how much you love data, so we make sure that your customers' data is encrypted and safely stored on the cloud.

INVENTORY MANAGEMENT

The most precise inventory management solution which automatically deducts raw materials with day-to-day billing.

CUSTOMER DATA RETENTION

Retain your customers' data such as birthdays, addresses, anniversaries, contact details, etc and use them to enhance your business.

DIGITAL ORDER PLACING

Reduce the manual work by replacing paper and pen with tablets and take orders using our restaurant application which is integrated with our dashboard.

FRANCHISE SUPPORT

Control, manage and compare performance and operations of various outlets from one dashboard.

WAIT-LIST MANAGEMENT

Machine learning enabled solution which assesses the waiting time of customers and automatically sends them reminders regarding the table availability.

USER FRIENDLY DESIGN

Our software is built with the simplest of design which enables you to focus on things that you should be focusing on - Food.
